

POST PEEL INSTRUCTIONS

AFTER YOUR ILLUMINIZE PEEL®: It is crucial to the health of your skin and the success of your peel that these guidelines be followed:

1. It is imperative to use a sunscreen with an SPF of at least 30 and avoid direct sunlight for at least 1 week.
2. Patients with hypersensitivity to the sun should take extra precautions to guard against exposure immediately following the procedure as they may be more sensitive following the peel.
3. Because of the superficial nature of this peel, patients should not expect to see visible peeling. Occasionally, some patients may have very minor flaking 3-4 days after the procedure.
4. Skin may appear slightly redder than usual for about 1 – 2 hours after the treatment. If neck and décolletage are treated, the redness might last slightly longer.
5. Skin should look normal the next day.
6. When washing the face, do not scrub, do not use a wash cloth. Use a soap-free cleanser such as SkinMedica Facial Cleanser.
7. After washing your face, apply SkinMedica TNS Ceramide Treatment Cream or appropriate SkinMedica moisturizer recommended by your medical professional for 4-5 days and as often as needed to relieve any dryness.
8. The regular use of Retin-A, alpha hydroxy acid (AHA) products or bleaching creams can be resumed after 4-5 days.
9. Wait until flaking or mild peeling completely subside before having ANY OTHER FACIAL PROCEDURES, including:
 - Facials
 - Microdermabrasion
 - Laser treatments (including laser hair removal)
 - Facial hair removal
 - BOTOX injections
 - Injectable fillers

**Call the office immediately if you have any unexpected problems after the procedure.*

POST PEEL INSTRUCTIONS

AFTER YOUR VITALIZE PEEL®/ REJUVENIZE PEEL™: It is crucial to the health of your skin and the success of your peel that these guidelines be followed:

1. If retinoic acid was used as part of your treatment, your skin will have a light yellow tinge immediately after the procedure. This is temporary and will fade in 1 to 2 hours. SkinMedica recommends waiting until the evening to wash your face, however if you should choose to wash it sooner, please wait until after the yellow tinge completely disappears (1 to 2 hours).
2. It is imperative that you use a sunscreen with an SPF of at least 30 and avoid direct sunlight for at least 1 week.
3. Patients with hypersensitivity to the sun should take extra precautions to guard against exposure immediately following the procedure as they may be more sensitive following the peel.
4. Your skin may be more red than usual for 2 to 5 days. Please avoid strenuous exercise during this time.
5. Approximately 48 hours after the treatment, your skin will start to peel. This peeling will generally last 2 to 5 days. DO NOT PICK OR PULL THE SKIN. Allow skin to peel at its own pace.
6. When washing your face, do not scrub, do not use a wash cloth. Use a gentle cleanser such as SkinMedica Sensitive Skin Cleanser or any other cleanser that does not contain soap.
7. After washing your face, apply SkinMedica TNS Ceramide Treatment Cream appropriate SkinMedica moisturizer recommended by your medical professional for 4-5 days and as often as needed to relieve any dryness.
8. You may resume the regular use of Retin-A, alpha hydroxy acid (AHA) products or bleaching creams ONLY after the peeling process is complete.
9. Wait until peeling completely subsides before having ANY OTHER FACIAL PROCEDURES, including:
 - Facials
 - Microdermabrasion
 - Laser treatments (including laser hair removal)
 - Facial hair removal
 - BOTOX injections
 - Injectable fillers

**Call the office immediately if you have any unexpected problems after the procedure.*
